

Color chips shown are intended to show the approximate color of the finish. Color will vary depending on the method of application & texture style. Texturing will potentially increase the depth of the color. Weather, job conditions, and base coat are extreme factors in the final color & should be expected. Applying a sample on a substrate before proceeding with the application is recommended. For color confirmation, an actual sample in the texture and color should be requested prior to ordering material. Color should be approved by owner prior to application. Stucco Supply is not responsible for color correctness of applied finish.

Light Reflectance Value = Percent of light reflected from the surface (100% = White / 0% = Black). The higher the number, the less UV light the color absorbs and the greater the reflectance. These colors are intended to show the approximate color of medium Acrylic Finish.

Other textures and products may slightly vary.
